《简明中国文明史》  
*China: a 5,000-Year Odyssey*

Author: Tan Chung  
ISBN: 9787510463617

This book is written by a Chinese person who grew up in China and both taught about, and conducted research on Chinese civilization for over half a century in India and the US. The book credits the two great rivers, the Yangtze and Huanghe, for marking the contours of China on our globe, creating a Common Geographical Entity. Eventually, residents of the two river valleys developed a Common Civilization Entity within these contours. China emerged approximately 4,000 years ago, when a Common Political Entity was formed within this Common Civilization Entity.

《动力变革: 推动高质量发展的历史跨越》  
*Striving for More Robust Drivers: a Historic Leap-forward to High-quality Development*

Author: Chi Fulin  
ISBN: 9787500869221

Socialism with Chinese characteristics has entered a new era. In this particular context, China's economic development has entered a new phase. Its basic characteristics have shifted from high-speed growth to high-quality development. To achieve high-quality development, we must adhere to the supply-side structural reform as the main line, and promote quality change, efficiency change, and power change. Rights for English has been sold.
